

- 1 Q. Can we still participate in your upcoming RFP process for 60MW of renewable Energy? Is there a bias for one large generator or will you consider several smaller ones?
 - A. Parties who did not submit a Notice of Interest from the Solicitation of Interest issued last September can still participate in the HECO 100MW Renewable Energy Request for Proposal. The draft of the RFP was filed with the Commission on February 11 and is posted on the RFP Documents & Updates webpage. Please review the Evaluation Process and Evaluation Criteria located in Chapter 4 of the Draft RFP.
