

- 1 Q. Firm power is mentioned in several places in associated documents and in the lead in page announcing the draft RFP release, but the draft RFP itself seems to address only non firm power. Can firm power also be proposed in response to this RFP?
 - A. Please refer to Section 1.1 of the Draft RFP which states..." HECO will also consider proposals for firm energy resources (energy that has the capability of being scheduled or dispatched) as long as the resource qualifies under the Renewable Portfolio Standards ("RPS") eligibility requirements."
