

HAWAIIAN ELECTRIC COMPANY INVITES YOU TO HELP PLAN FOR OAHU'S FUTURE ELECTRICITY NEEDS

Hawaiian Electric Company is holding an open meeting for you to learn about and comment on its fourth Integrated Resource Planning (IRP) process.

What is Integrated Resource Planning?

- A process established by the Public Utilities Commission to forecast electricity demand and analyze ways to meet it.
- A means to identify the resources or mix of resources such as renewable energy, energy efficiency, energy conservation, central station power plants and others to meet our near and long-term electricity needs in an efficient and reliable manner and at the lowest reasonable cost.
- Ultimately, the IRP charts a course towards a preferred electrical energy future for Oahu.
